THREE "L" CARS JUMP THE TRAC

Panic-Stricken Passengers Pre vented from Leaping Off Platforms—Rails Spreading Probably Caused Accident.

The sixty passengers of a Ninth ave nue elevated train of five cars had a narrow escape from death or serious njury when the first three cars jumped the track just after the train had left South Ferry station early to-day.

Only the fact that the accident occurred so near the station, and before CHARLES ST., 11-Large front room, pa he train had gathered greater speed saved the three cars and possibly the entire train from falling to the street. A thorough investigation will be made to ascertain the cause of the accident. It is believed the spreading of the rails was responsible

When the cars jumped the track and bumped a few yards over the ties the passengers were seized with panic. When the shoe of the first car ran off the third rail all the lights on the train went out. This added greatly to the excitement. Men and women wildly rushed to the doors and would have jumped off the platforms if the guards had not driven them back.

When the lights went out the motive power was shut off, bringing the train o a standstill within a few yards from the station platform.

After the passengers quiet the guards informed them of the nature of the accident and permitted them to get out and walk back to scramble which followed, some of the and a strange woman dead in the basengers probably would have been she had never seen or heard of injured or killed by coming in conforman before. The police are sattact with the third rail had not track with Mrs. Pfefferman's state-
